

**INTERNATIONAL CONFERENCE ON COMMUNICATION, MANAGEMENT AND
INFORMATION TECHNOLOGY (ICCMIT 2017)**

**Special Session
on
"Software Engineering: Methods, Applications and Tools"**

Session Organizers and Chairs

Dr. Narayan Debnath, Winona State University, USA
(ndebnath@winona.edu)

and

Dr. Takaaki Goto, Ryutsu Keizai University, Japan
(tg@gotolab.net)

Call For Papers

Currently systems are increasingly complicated and highly-developed. Therefore, advanced methodologies are desired to solve such difficult problem. Combination of theoretical aspect and practice is significant to advance software technology.

This special session provides a forum to discuss new models or applications to real problems, and their tools. We welcome innovative discussions with researches and practitioner, and wish to share ideas for application and tools on software engineering. Technical paper submissions in various topics of Software engineering are encouraged.

Topics may include, but not limited to, the following:

- Algorithm Development
- Computer Aided Software Engineering (CASE)
- Computer-Aided Design/Manufacturing
- Embedded Systems
- Enterprise Application Integration
- Formal Methods
- Knowledge-based Systems
- Models, Metrics, and tools
- Open Source Software
- Software Architectures
- Software Requirements and Specifications
- Software Verification and Validation
- Software Testing
- Communications Software
