

# **Call for Papers on ICCMIT2018**

## **Artificial Intelligence for Industrial Revolution 4.0 (AIIR2018)**

### **Organized by:**

Norshuhani Zamin, Ph.D.  
University Malaysia of Computer Science and Engineering, Malaysia.  
E-mails: norshuhani@unimy.edu.my

### **SCOPE AND OBJECTIVES**

Artificial Intelligence (AI) is the brain behind the Industrial Revolution (IR) 4.0. The transformative power of AI has changed the automation and robotics into the muscle for IR 4.0. AI is moving at a pace that's beyond imagination of many policy makers. AI is the key enabler for the next generation of smart manufacturing. IR 4.0 has taken major transformation in the industry with the power of advanced computing, analytics, low-cost sensing and new levels of connectivity permitted by the internet. Cyber-physical systems and machine learning can lead to a disruption in traditional workflows, supply chains, value creation, and business models in manufacturing and works towards empowering and expanding workforce expertise. AIIR2018 supports coordinated research, development and deployment activities on AI for IR 4.0, in particular in the following areas:

- Technological Challenges of IR 4.0
- Machine Learning
- Natural Language Processing
- Internet of Things
- Cloud Computing
- Cyber-physical Systems
- Robotics
- Virtual Reality
- Augmented Reality
- 3D Printing

### **Paper Submission**

All instructions and templates for submission can be found in the ICCMIT2018 website: <http://www.iccmit.net/>. The accepted papers will be published in ISI/SCOPUS journals. Also, the best articles will be invited to be published again after expansion as book chapter in IGI Book.

### **Important Dates**

Paper abstract submission:	February 15, 2018
Notification of acceptance:	February 22, 2018
Final paper submission and camera ready:	March 7, 2018
Conference Dates:	April 2-4, 2018
